Motorized by three units of individual stepper, variable AA belts speed is adjustable separately as requests.

Has memory function, could remember twenties productions checking values

Can connect with the vertical packaging machine with feedback function.

Frame with IP66 protection and Full Stainless Steel Configuration

Reject system can be equipped.(optional)

Specification

Standard Weight Range - 5-30Kg

Accuracy: g - $\pm 1-2g$

Min. Scale- 5g

Target Weight Storage- 10

Speed: bag/min-30-60

The machine size can be designed according to the product - Products length - $\leq 800mm$

Products width: $\leq 500mm$

Products height: $\geq 5mm$

Power: 750W

Voltage/Frequency-AC220V $\pm 10\%$ /50Hz
